It is online music player which used to play songs and stop, pause, change – HTML, CSS, JAVASCRIPT

Internship Project: Securing IOT data using Blockchain(Web development Project)
Blockchain has emerged as the possible solution for creating more secure IoT systems in the time to come to come. In this paper, first an overview of the blockchain technology and its implementation has been explained; then we have discussed the infrastructure of IoT which is based on Blockchain network and at last a model has been provided for the security of internet of things using blockchain. – Python, Django, MySQL, Wamp Server 2.4 .

Vehicle Service Management System (04/2023 - 08/2023)
This system "Vehicle Service Management System (VSMS)" allows providing vehicle for service. If customer got any problem with his vehicle, they are providing services - Using PHP and MySQL. The real power of this project lies not in direct selling of products, but in the creation of tighter relationships with customers and delivering of a high level of service and support, which in turn improves organization sales and its goodwill. A service organization is a business entity that takes care of servicing a customer instrument in the after sales domain.
